## BS1010 range

The following taps are available as standard versions and alternatively as a 'BS' version where the tap has been manufactured to British Standard 1010 - a dimensional standard for product quality, design and manufacture. Astracast BS1010 taps share common and interchangeable components with BS1010 taps produced by other manufacturers for simple repair and maintenance

## Benefits

- Purpose designed collection to suit the requirements of the architect, developer and contractor
- An excellent heritage of providing superior quality kitchen products to the trade
- All taps are manufactured to strict quality control standards. Those products prefixed with 'BS' conform to British Standard 1010
- Excellent choice of taps including single lever, monobloc, pillars, deck and bridge designs to suit traditional through to contemporary kitchens
